Cleaners & Degreasers

- CONTACT CLEANER
- CARB CLEANER
- ENGINE CLEANER
- BRAKE CLEANER
- PRO WASH
- FUCHS-OFF

CONTACT CLEANER

A powerful solvent designed to clean components with the minimum of fuss, leaving no residual film. Its vigorous penetration and quick drying action makes Contact Cleaner perfect for cleaning fouled plugs, dirty points and other precision parts. Contact Cleaner is ideal for cleaning suspension and engine components during assembly, thereby ensuring maximum component life.

CARB CLEANER

A selected blend of solvents which is designed to remove gum and resin build-up from carburettors, fuel injection systems and automatic chokes, allowing smoother operation and improving engine efficiency. Start engine with the air filter removed. With the throttle set at quarter to half open, spray cleaner into air intake until the engine begins to stall. Cease spraying and refit the filter. Carb Cleaner is also suitable for cleaning throttle linkages and carburettor bodies.

ENGINE CLEANER

A high power, water washable general purpose degreasing and cleaning spray, formulated to cut through the worst grease and grime. Easy to apply and fast acting, it is ideal for all heavy duty cleaning uses. It will not harm plastics, hoses or paintwork. Apply to dirty surface, allow to stand for 10 minutes then hose off with water. Brushing assists removal of persistent built-up oil, grease and 'grime'.

BRAKE CLEANER

A non-chlorinated solvent for removing dirt, dust, grease, oil and brake fluid from brake discs, calipers and drums, Brake Cleaner helps maintain the efficient operation of braking systems. It is specially formulated to remove persistent brake pad dust, preventing "brake squeal" and "chatter" and is also suitable for precision degreasing of metal parts, leaving NO oily film.

PRO WASH

This is a super effective environmentally friendly biodegradable cleaner specially developed for off-road motorcycles, street bikes and scooters. Pro Wash removes dirt, grime and oily deposits with the minimum of effort - no need to scrub and polish! Simply spray your bike with Pro Wash, then rinse off. For the ultimate, gleaming 'factory finish', allow your bike to dry after washing and then apply Silkolene Pro Prep. Pro Wash is really effective on all surfaces, including plastics and aluminium.

FUCHS-OFF

An entirely new cost-effective spray on/hose off bike cleaner suitable for all street and off-road bikes, quads and ATV's. Fuchs-Off has been specially designed to rapidly remove all types of dirt from metals and plastics with minimum 'hands-off' effort. The latest detergent technology allows Fuchs-Off to clean unprotected aluminium alloy components without corrosive effects. Plastics, paint, rubber and glass surfaces can be cleaned again and again without deterioration or cracking. Apply neat with a hand pump-spray and finish off with Silkolene Pro-Prep for that elusive, gleaming 'factory finish'.
