

TITAN GT1 PRO C-1 5W-30

Synthetic engine oil for Mazda vehicles fitted with exhaust treatment systems such as particulate filters or CRT

Description

TITAN GT1 PRO C-1 5W-30 is a premium synthetic engine oil for today's engines fitted with exhaust treatment systems such as particulate filters or CRT's. This product is suitable for turbocharged or normally-aspirated diesel and gasoline engines designed for the use of special fuel economy engine oils. TITAN GT1 PRO C-1 5W-30 is formulated with state-of-the-art additive technology and contains top quality synthetic base oils.

Application

Lowest levels of sulphated ash, phosphorus and sulphur protect and extend the service life of all exhaust treatment systems.

Excellent protection against wear in advanced, highly-stressed diesel and gasoline engines.

Outstanding cold-starting properties.

Advantages/Benefits

- TITAN GT1 PRO C-1 5W-30 reduces fuel consumption and protects particulate filters and engine components
- We recommend that manufacturers' oil change intervals should be observed to generate the best possible economy and service life
- TITAN GT1 PRO C-1 5W-30 is fully miscible with other mono- and multigrade engine oils. However, mixing with other engine oils should be avoided because this can reduce or even eliminate the product's performance

Specifications

TITAN GT1 PRO C-1 5W-30 meets the following specifications:

- ACEA C1
- ACEA A5/B5
- JASO DL-1

TITAN GT1 PRO C-1 5W-30 is specially recommended by the following OEM:

- MAZDA

Description / Application (Continued)

That SAE 5W-30 high performance fuel economy oil is a true all-season product. Tests do prove that TITAN GT1 PRO C-1 5W-30 reduces fuel consumption significantly compared to conventional motor oils. TITAN GT1 PRO C-1 5W-30 is applicable for all vehicles where ACEA C1 engine oils are specified.

Apart from lower fuel consumption, TITAN GT1 PRO C-1 5W-30 also reduces friction and wear in the engine because it circulates rapidly. The good detergent properties of TITAN GT1 PRO C-1 5W-30 keeps engines clean and guarantees the perfect lubrication of all engine components.

Optimum fuel economy in part- and full-throttle operating conditions

Reduces the formation of deposits in engines and turbochargers, leading to increased reliability and lowers maintenance costs

Very good ageing stability over the entire oil change interval.
